

Student Enrollment & Course Management System (SECMS)

User Story:

The Student Enrollment & Course Management System is a comprehensive Salesforce application designed to streamline and automate the academic enrollment operations of an educational institute. This system enables administrators, enrollment officers, and instructors to efficiently manage student records, course offerings, enrollments, instructor assignments, approval processes, payments, and reporting—all within a unified Salesforce environment.

1. INTRODUCTION

1.1 Project Overview :

This project aims to centralize all student, course, and enrollment-related data within a single Salesforce application to ensure easy data access, structured workflows, and accurate reporting. The system allows Enrollment Officers to manage student admissions, course registrations, and communication effectively, while instructors and administrators gain full transparency into course allocations and academic progress. The solution also enables automated instructor assignment, task creation, validation checks, and multi-level approval processes for enrollment management.

With Salesforce Flows, Approval Processes, Validation Rules, Reports, and Dashboards, the organization can ensure that all enrollment operations—from admission to course completion—are handled systematically and with continuous monitoring of key performance indicators such as enrollment volume, revenue, student status distribution, and pending approvals.

1.2 Purpose :

The primary purpose of SECMS is to replace manual and fragmented enrollment processes with a scalable, automated, and secure Salesforce solution that ensures:

Accurate student data management

Structured enrollment workflows

Automated approvals and validations

Transparent reporting and monitoring

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Enrollment Officer	manage student enrollments efficiently	enrollment data is scattered	systems are manual and unintegrated	frustrated and error- prone
PS-2	Administrator	track enrollments and revenue	reporting is delayed	data is not centralized	uncertain in decision- making

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

2.2 Empathy Map Canvas

User Persona: Enrollment Officer

- **Think & Feel:** Concerned about double bookings and revenue loss
- **Hear:** Complaints from students and management
- **See:** Multiple spreadsheets and emails
- **Say & Do:** Rechecks data, follows up manually
- **Pain:** Duplicate entries, approval bottlenecks
- **Gain:** Automation, dashboards, faster processing

2. IDEATION PHASE

2.2 Empathy Map Canvas

2.3 Brainstorming & Idea Prioritization

Step 1 – Brainstormed Ideas

- Spreadsheet automation
- Standalone enrollment portal
- ERP integration
- Salesforce-based enrollment system

Step 2 – Grouping

- Manual solutions
- Semi-automated solutions
- Fully automated cloud solutions

Step 3 – Prioritization

Salesforce-based SECMS was selected due to **high feasibility** and **high impact**.

2.3 Brainstorming & Idea Prioritization — Student Enrollment & Course Management System (SECMS)

3.REQUIREMENT ANALYSIS PHASE

3.1 Customer Journey Map

Stages covered:

- Awareness & Registration
- Course Selection
- Enrollment Request
- Fee Payment
- Approval
- Instructor Assignment
- Reporting & Completion

3.1 Customer Journey Map – Student Enrollment & Course Management t (SECMS)

3.2 Solution Requirements

Functional Requirements

FR No	Epic	Description
FR-1	Student Management	Manage student records
FR-2	Course Management	Create and manage courses
FR-3	Enrollment Processing	Request, approve, reject enrollments
FR-4	Instructor Assignment	Auto-assign instructors
FR-5	Reporting	Dashboards and reports

Non-Functional Requirements

NFR-1: Usability

The system shall provide a simple, intuitive, and user-friendly interface that enables enrollment officers, administrators, instructors, and students to perform operations efficiently with minimal training. Navigation shall be organized through clearly labeled tabs, dashboards, and forms to reduce user effort and errors.

Examples:

- Quick student registration form
- One-click enrollment approval
- Role-based dashboards

NFR-2: Security

The system shall ensure the confidentiality, integrity, and protection of student and institutional data through secure authentication, authorization, and access controls. Sensitive information such as personal data, enrollment history, and academic records shall only be accessible to authorized users.

Examples:

- Only admins can modify course details
- Instructors view only assigned students
- Students cannot access other student records

NFR-3: Reliability

The system shall operate consistently and accurately without failures during enrollment processing, approvals, and reporting. Automation logic shall execute correctly to avoid duplicate or incorrect enrollments.

Examples:

- No duplicate course registration
- Accurate status updates after approvals
- Consistent report generation

NFR-4: Performance

The system shall provide fast response times for all operations to ensure smooth and uninterrupted user experience, especially during peak admission periods.

Examples:

- Quick dashboard refresh
- Fast search for student records
- No lag during bulk uploads

NFR-5: Scalability

The system shall support future growth in the number of students, courses, departments, and users without degradation in performance or functionality. It shall allow easy addition of new modules and features.

Examples:

- Add new departments without redesign
- Handle increased admissions annually
- Extend to mobile or portal integration

NFR-6: Availability

The system shall be continuously accessible to users during institutional working hours and must minimize downtime. The platform shall support high availability for academic operations.

Examples:

- 24/7 cloud access
- Reliable during peak admission season
- Automatic backup of student records

3.3 Data Flow Diagram

- User inputs student and enrollment data
- System validates and stores records
- Approval process routes data
- Reports and dashboards consume processed data.

The system processes enrollment requests, validates data, routes approvals, assigns instructors, and generates reports.

3.3 Data Flow Diagram – Student Enrollment & Course Management System (SECMS)

3.4 Technology Stack

Layer	Technology
UI	Salesforce Lightning
Logic	Salesforce Flows
Database	Salesforce Objects

Automation	Validation Rules, Approval Process
Reporting	Reports & Dashboards

4. PROJECT DESIGN PHASE

4.1 Problem–Solution Fit

SECMS directly addresses fragmented enrollment workflows by aligning user behavior, constraints, and automation using Salesforce-native capabilities.

4.2 Proposed Solution

Functional Requirements

Parameter	Description
Problem	Manual enrollment handling
Solution	Salesforce-based SECMS
Novelty	End-to-end automation
Social Impact	Improved student experience
Revenue Model	Institutional deployment
Scalability	Multi-department support

4.3 Solution Architecture

The architecture integrates Salesforce objects, automation flows, approval processes, dashboards, and security layers.

4.3 Solution Architecture

5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

- Agile methodology
- Epics → Stories → Story Points
- Sprint-based execution
- Velocity calculation used for estimation

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Developer Setup	USN-1	As a system administrator, I want to create a Salesforce developer account so that I can configure and deploy the Student Enrollment system..	1	High	Member1
Sprint-1	Data Modeling	USN-2	As an admin, I want to create custom objects for Student,	3	High	Member2

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
			Course, Enrollment, and Instructor so that academic data can be stored and managed efficiently.			
Sprint-2	Data Modeling	USN-3	As a user, I want dedicated tabs for each object so that I can easily navigate between students, courses, enrollments, and instructors.	3	High	Member3
Sprint-2	Data Modeling	USN-4	As an admin, I want to create relevant fields such as student details, course information, and enrollment status so that complete records can be captured accurately.	5	High	Member4
Sprint-2	Data Modeling	USN-5	As an enrollment officer, I want a centralized Lightning App so that I can access all academic operations from one interface.	3	High	Member4
Sprint-2	Data Modeling	USN-6	As an admin, I want to define relationships between students, courses, and enrollments so that the system can logically link and track academic activities.	5	Medium	Member1
Sprint-2	Data Modeling	USN-7	As a user, I want customized page layouts so that only relevant information is displayed, improving clarity and ease of data entry.	5	High	Member2
Sprint-3	Automation	USN-8	As a system, I want to validate input data such as mandatory fields and enrollment limits so that incorrect or incomplete records are prevented.	3	High	Member4
Sprint-3	Automation	USN-9	As a system, I want automated flows to handle enrollment processing and notifications so that manual effort is reduced and processes become faster.	3	High	Member4
Sprint-3	Automation	USN-10	As an administrator, I want an approval process for enrollment requests so that registrations are verified before confirmation.	5	High	Member1
Sprint-4	Security	USN-11	As an admin, I want to configure role-based security so that users can only access data relevant to their responsibilities.	5	High	Member2
Sprint-5	Reports	USN-12	As a manager, I want reports on student enrollments, course registrations, and instructor assignments so that I can monitor academic operations.	4	High	Member3
Sprint-6	Dashboards	USN-13	As a manager, I want visual dashboards showing enrollment	4	Medium	Member4

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
			statistics and trends so that I can quickly analyze system performance.			

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6 Days	24 Oct 2022	29 Oct 2022	20	29 Oct 2022
Sprint-2	20	6 Days	31 Oct 2022	05 Nov 2022		
Sprint-3	20	6 Days	07 Nov 2022	12 Nov 2022		
Sprint-4	20	6 Days	14 Nov 2022	19 Nov 2022		

6. Project Development Phase:

Project Flow:

Milestone 1: Salesforce Developer Account Creation

Milestone 2: Custom Object Creation (Student, Course, Enrollment, Instructor)

Milestone 3: Tabs Creation

Milestone 4: Lightning App Creation

Milestone 5: Fields Creation

Milestone 6: Create Relationships

Milestone 7: Page Layout Customization

Milestone 8: Validation Rules

Milestone 9: Flows (Automation)

Milestone 10: Approval Process

Milestone 11: Reports

Milestone 12: Dashboards

Milestone 13: Security Setup

Milestone 14: Conclusion

What you'll learn

1. Real-time Salesforce project implementation
2. Designing custom objects and relationships
3. Creating page layouts & record types
4. Writing validation rules
5. Building automation with flows
6. Creating approval workflows
7. Developing reports & dashboards
8. Setting up security with profiles, permission sets, and sharing
9. End-to-end application testing

Milestone 1-Salesforce :

Introduction:

Are you new to Salesforce? Not sure exactly what it is, or how to use it? Don't know where you should start on your learning journey? If you've answered yes to any of these questions, then you're in the right place. This module is for you.

Welcome to Salesforce! Salesforce is game-changing technology, with a host of productivity-boosting features, that will help you sell smarter and faster. As you work toward your badge for this module, we'll take you through these features and answer the question, "What is Salesforce, anyway?".

What Is Salesforce?

Salesforce is your customer success platform, designed to help you sell, service, market, analyze, and connect with your customers.

Salesforce has everything you need to run your business from anywhere. Using standard products and features, you can manage relationships with prospects and customers, collaborate and engage with employees and partners, and store your data securely in the cloud. So what does that really mean? Well, before Salesforce, your contacts, emails, follow-up tasks, and prospective deals might have been organized something like this:

<https://youtu.be/r9EX3IGde5k>

Activity 1: Creating Developer Account:

Creating a developer org in salesforce.

Go to <https://developer.salesforce.com/signup>

On the sign up form, enter the following details :

Build enterprise-quality apps fast to bring your ideas to life

- Build apps fast with drag and drop tools
- Customize your data model with clicks
- Go further with Apex code
- Integrate with anything using powerful APIs
- Stay protected with enterprise-grade security
- Customize UI with clicks or any leading-edge web framework

Sign up for your Salesforce Developer Edition
A full-featured copy of the Platform, for free

Complete the form to start your free trial. Our team will be in touch to help you make the most of your trial.

First Name*
Your first name

Last Name*
Your last name

Email*
Your email address

Role*
Your job role

Company*
Company Name

First name & Last name : Bharathi C

Email :

Role : Developer

Company : John Dewey College Of Arts And Science For Women

County : India

Postal Code : 607 205

Username : chinnaduraiezhil1978.379f09c14b4a@agentforce.com

should be a combination of your name and company

This need not be an actual email id, you can give anything in the format :

username@organization.com

Click on sign me up after filling these.

Activity 2: Account Activation:

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

2. Click on Verify Account

3. Give a password and answer a security question and click on change

The image shows a laptop screen displaying the Salesforce password change interface. The browser tabs at the top include 'Welcome to...' and 'Change your...'. The URL bar shows 'salesforce.com'. The main heading is 'Enter a new password for' followed by the email address 'chinnadurazhil1978.379f09c14b4a@agentforce.com'. Below this, it says 'Make sure to include at least:' followed by three requirements, each with a checkmark: '8 characters', '1 letter', and '1 number'. The form contains several fields: 'New Password' (masked with dots and labeled 'Good'), 'Confirm New Password' (containing 'Aysha20?' and labeled 'Match'), 'New Security Question' (a dropdown menu showing 'In what city were you born?'), and 'New Answer' (containing 'Pondy' and labeled 'Good'). A note at the bottom left of the form states '* = required'. A large blue button labeled 'Change Password' is positioned below the form. At the very bottom of the screen, a status bar indicates 'Password was last changed on 9/29/2026, 1:31 AM'. The laptop's taskbar is visible at the bottom, showing the Windows logo, a search bar, and various application icons. The Acer logo is visible on the laptop bezel, and a watermark for 'REDMI NOTE 5 PRO MI DUAL CAMERA' is present in the bottom left corner of the image.

Enter a new password for
chinnadurazhil1978.379f09c14b4a@agentforce.com.

Make sure to include at least:

- ✓ 8 characters
- ✓ 1 letter
- ✓ 1 number

* New Password

..... Good

* Confirm New Password

Aysha20? Match

* New Security Question

▼ In what city were you born?

* New Answer

Pondy Good

* = required

Change Password

Password was last changed on 9/29/2026, 1:31 AM.

4. Then you will redirect to your salesforce setup page.

Milestone 2 – Objects:

Activity 1: Creating Student Object:

The purpose of creating the Student custom object is to store and manage information about students such as their personal details, contact information, and enrollment status.

To create the Student object:

Go to the Setup page.

Click on Object Manager.

Click on Create → Custom Object.

Enter the details as below:

1. Label: Student
2. Plural Label: Students

3. Object Name: Student
4. Record Name: Student Name
5. Data Type: Text
6. Under Optional Features, select:
7. Allow Reports
8. Allow Activities (optional but recommended)
9. Track Field History (optional, if you want)
10. Under Search Status, select:
11. Allow Search
12. Click Save.

Custom Object Definition Edit

Custom Object Information

The singular and plural labels are used in tabs, page layouts, and reports. Be careful when changing the name or label as it may affect existing integrations and merge templates.

Label: Student Example: Account

Plural Label: Students Example: Accounts

Starts with vowel sound: ☐

The Object Name is used when referencing the object via the API.

Object Name: Student Example: Account

Description

Context-sensitive help setting: ☒ Open the standard Salesforce.com Help & Training window ☐ Open a window using a Visualforce page

Content Name: None

Enter Record Name Label and Format

The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Record Name: Student Name Example: Account Name

Date Type: Text Warning: If you plan to insert a high volume of records in this object, via the API for example, use the Text data type.

Optional Features

☒ Allow Reports

☒ Allow Activities

☐ Track Field History

☐ Allow in Chatter Groups

☐ Enable Licensing

Object Classification

When these settings are enabled, this object is classified as an Enterprise Application object. When these settings are disabled, this object is classified as a Light Application object. Learn more.

When this setting is enabled, your users can find records of this object type when they search. Learn more.

☒ Allow Search

Save Save & New Cancel

In the same way Create **Courses, Instructors, and Enrolments objects**

Milestone 3 - Fields:

Table 1: Student Object Fields:

Field Label	Data Type
Student Name	Text (Standard)
Email	Email
Phone	Phone
Date of Birth	Date
Student Status	Picklist
Address	Text Area

Table 2: Course Object Fields:

Field Label	Data Type
Course Name	Text (Standard)
Category	Picklist
Duration	Number/Text
Course Fee	Currency
Description	Text Area

Table 3: Instructor Object Fields:

Field Label	Data Type
Instructor Name	Text (Standard)

Instructor Code	Text
Expertise	Picklist
Phone	Phone
Email	Email

Table 4: Enrollment Object Fields:

Field Label	Data Type
Student	Lookup (Student)
Course	Lookup (Course)
Instructor	Lookup (Instructor)
Enrollment Date	Date
Enrollment Status	Picklist
Fees Paid	Checkbox
Total Amount	Currency
Comments	Text Area

Milestone 4 – Create Relationships:

1. Activity 1: Create Lookup from Enrollment to Student:

1.

Go to Setup → click Object Manager.

2. Type Enrollment in Quick Find → click Enrollment__c object.

3. Click Fields & Relationships → click New.

4. Select Lookup Relationship → click Next.
5. For Related To, select Student__c → click Next.
6. Enter Field Label: Student (API Name: Student__c).
7. Click Next through Field-Level Security and Layout options (ensure it's visible and added to layout).
8. Click Save.

The screenshot shows the 'Custom Field Definition Edit' page for a field named 'Student'. The page is divided into several sections:

- Field Information:** Contains fields for Field Label (Student), Field Name (Student), Description, and Help Text. It also includes dropdowns for Data Owner (User), Field Usage (None), and Data Sensitivity Level (None). A Compliance Categorization section shows a list of categories (PII, HIPAA, GDPR, PCI) with a 'Chosen' button.
- Lookup Options:** Includes a 'Related To' dropdown set to 'Student', a 'Related List Label' dropdown set to 'Enrollments', and a 'Child Relationship Name' dropdown set to 'Enrollments'. There are also checkboxes for 'Required?' and 'Delete this record also'.
- Lookup Filter:** A section at the bottom for defining filters for the lookup.

Activity 2: Create Lookup from Enrollment to Course

Purpose:

To link each Enrollment to a Course.

Steps:

1. Go to Setup → Object Manager → Enrollment__c.
2. Click Fields & Relationships → New.
3. Select Lookup Relationship → Next.
4. Related To: select Course__c → click Next.
5. Field Label: Course (API Name: Course__c).
6. Click Next (set visibility and layout) → Save.

The screenshot shows the Salesforce Setup interface in Developer Edition. The navigation menu on the left includes Setup, Home, and Object Manager. The main content area is titled 'Enrollment' and shows the 'Custom Field Definition Edit' page for a field named 'Course'. The page is divided into several sections: 'Field Information', 'Lookup Options', and 'Lookup Filter'. In the 'Field Information' section, the 'Field Label' and 'Field Name' are both set to 'Course'. The 'Data Owner' is set to 'User'. In the 'Lookup Options' section, the 'Related To' is set to 'Course' and the 'Related List Label' is set to 'Enrollments'. The 'Lookup Filter' section is currently empty.

Activity 3: Create Lookup from Enrollment to Instructor:

Purpose:

To store which Instructor is assigned to a particular Enrollment.

Steps:

1. Go to Setup → Object Manager → Enrollment__c.
2. Click Fields & Relationships → New.
3. Choose Lookup Relationship → Next.
4. Related To: select Instructor__c → Next.
5. Field Label: Instructor (API Name: Instructor__c).
6. Complete Field- Level Security and Page Layout options → Save

SETUP → OBJECT MANAGER

Lookup Options

Related To: Instructor
Related List Label: Enrollments
Required: ☐ Always require a value in this field in order to save a record.
☒ Clear the value of this field. You can't choose this option if you make this field required.
What to do if the lookup record is deleted?
☐ Delete this record also. This allows users to delete large numbers of records without regard for sharing or visibility constraints.
☐ Don't allow deletion of the lookup record that's part of a lookup relationship.

Child Relationship Name: Enrollments

Lookup Filter

Milestone 5 – Validation Rules:

Activity 1: Student Email Domain Validation

Purpose:

To ensure students use only allowed institutional email addresses.

Steps:

Go to Setup → Object Manager → Student__c.

Click Validation Rules → New.

Rule Name: Student_Email_Domain_Validation.

Error Condition Formula: (example for @student.edu)

- NOT(CONTAINS(Email__c, "@student.edu"))

Error Message: Email must be a valid student institutional email.

Error Location: Field → Email__c.

Click Save.

Activity 2: Fees Must Be Paid Before Approval

Purpose:

Prevent Enrollment from being approved until fees are paid.

Steps:

1. Go to Setup → Object Manager → Enrollment__c.
2. Click Validation Rules → New.
3. Rule Name: Fees_Must_Be_Paid_Before_Approval.

4. Error Condition Formula:

```
AND(  
    ISPICKVAL(Enrollment_Status__c, "Approved"),  
    Fees_Paid__c = FALSE  
)
```

5. Error Message: Fees must be paid before approving an enrollment.

6. Error Location: Top of Page (or field as needed).

Click Save.

Milestone 6 – Approval Process

Activity 1: Create Approval Process for Enrollment Requests

Purpose:

Route Enrollment requests to the Training Manager for approval or rejection.

Steps:

1. Go to Setup → Approval Processes → select Enrollment__c.
2. Click Create New Approval Process → Use Standard Setup.
3. Process Name: Approval_Enrollment_Request.
4. Entry Criteria: Enrollment_Status__c = "Requested".
5. Save and configure steps.

15. Activate the approval process.

Milestone 7- Tabs

Activity 1: Creating a Tab for the Student Object:

Go to Setup.

1. In the Quick Find box, type Tabs.
2. Under Custom Object Tabs, click New.
3. Select Student from the object list.
4. Choose a tab style (icon).
5. Click Next, assign it to all profiles, and then click Save.

Rename **Tabs** and Labels

Tabs

Didn't find what you're looking for? Try using Global Search.

SETUP

Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Custom Object Tabs

New
What Is This?

Action	Label	Tab Style	Description
Edit Del	Courses	Books	
Edit Del	Enrollments	Form	
Edit Del	Instructors	People	
Edit Del	Students	People

Edit	Get Started with MuleSoft	Heart	
Edit	Get Started with Salesforce DX	Building Block	
Edit	Welcome	Gears	

File Explorer

Activity 2: Creating Remaining Tabs

Now create the Tabs for the remaining Objects, they are “Courses, Instructors, Enrollment”.

Follow the same steps as mentioned in Activity -1

Milestone 8 - The Lightning App

Activity 1: Creating the Lightning Application for the Project

Navigate to Setup.

Enter App Manager in the Quick Find search box.

Click New Lightning App.

Provide the app details:

App Name: Student Enrollment & Course Management

Developer Name auto-fills

Description: Optional, but can describe the purpose of the app

Click Next and choose the following settings:

App Branding (optional): Add logo or select color theme

Navigation Style: Choose Standard Navigation

Click Next and assign the app to specific profiles (e.g., **Admin, Enrollment Officer, Instructor**).

Click Next to select the items (tabs) to be included in the app. Add:

1. Student
2. Course
3. Instructor
4. Enrollment
5. Reports
6. Dashboards
7. Home
8. Tasks

Click Next and review the app settings.

Finally, click Save & Finish.

Milestone 9 – Page Layouts and Record:

Activity 1: Create Record Types for Enrollment:

Purpose:

To separate New Enrollment vs Re-Enrollment processes.

Steps:

1. Go to Setup → Object Manager → Enrollment__c.
2. Click Record Types → New.
3. For the first record type:
 - Existing Record Type: Master
 - Record Type Label: New Enrollment
 - Enable for required profiles (Admin, Enrollment Officer).
 - Select the default Page Layout → Save & New.
4. For the second record type:
 - Record Type Label: Re-Enrollment
 - Enable for the same profiles.
 - Select the default Page Layout → Save.

Activity 2: Separate Page Layout Creators for Each Enrollment Record Type

Purpose:

To show different fields for New Enrollment vs Re-Enrollment.

Steps:

1. Enrollment__c object → click Page Layouts.
2. Click New to create a layout for New Enrollment:
 - Clone from existing Enrollment Layout → name it New Enrollment Layout → Save.
 - Keep fields relevant for first-time enrollment: Student, Course, Instructor, Enrollment Date, Status, Fees, etc.
 - Remove unnecessary re-enrollment fields if any.

- Click Save.

3. Again, click New to create Re-Enrollment Layout:

- Clone existing layout → name it Re-Enrollment Layout → Save.
- Include fields like previous Enrollment reference (if any), Re-Enrollment Reason, Status, Fees, etc.
- Click Save.

4. Click Page Layout Assignment → Edit Assignment.

5. For each profile and record type:

- New Enrollment → use New Enrollment Layout.

6.Re-Enrollment → use Re-Enrollment Layout.

Click Save.

Activity 3: Enrollment Related Lists to Parent Objects:

Purpose:

To see all Enrollments from Student, Course, and Instructor records.

a) Student → Enrollment Related List

Go to Setup → Object Manager → Student__c.

Click Page Layouts → open the main layout.

In the palette, select Related Lists.

Drag Enrollments related list onto the layout.

Customize columns if needed → Save.

b) Course → Enrollment Related List

Go to Object Manager → Course__c → Page Layouts.

Open layout → add Enrollments related list.

Save.

c) Instructor → Enrollment Related List

Go to Object Manager → Instructor__c → Page Layouts.

Open layout → add Enrollments related list.

Save.

Milestone 10 – Automation with Flow

Activity 1: Auto-Populate Enrollment Date (Record-Triggered Flow)

Purpose:

Set Enrollment_Date__c to today when Enrollment is created.

Steps:

1. Go to Setup → Flows → New Flow.
2. Select Record-Triggered Flow → Create.
3. Object: Enrollment__c.
4. Trigger: A record is created.
5. Optimize for Actions and Related Records → Done.

Select Object

Select the object whose records trigger the flow when they're created, updated, or deleted.

* Object

Enrollment

Configure Trigger

Trigger the Flow When:

- ☒ A record is created
 - ☐ A record is updated
 - ☐ A record is created or updated
 - ☐ A record is deleted
-

Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of records that trigger the flow to conserve your org's resources.

Condition Requirements

None ▼

6. Add Update Records element:

- Label: Set Enrollment Date.
- Use a record that triggered the flow.
- Field: Enrollment_Date__c → Value: \$Flow.CurrentDate.

7. Save as SetEnrollmentDate → Activate.

 Update Records

 Running Flow Interview > CurrentDate ×

Activity 2: Send Email When Enrollment Approved

Purpose:

When Enrollment_Status__c = Approved, send email, alert admin, and set Student to Active.

Steps (high level for document):

1. Create Email Template and Email Alert for student notification.
2. Go to Flows → New → Record-Triggered Flow.
3. Object: Enrollment__c, Trigger on update.
4. Condition: Enrollment_Status__c Equals "Approved".

 Configure Start

Enrollment

Configure Trigger

Trigger the Flow When:

☐ A record is created

☐ A record is updated

☒ A record is created or updated

☐ A record is deleted

Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of times the flow is executed. Minimizing unnecessary flow executions helps to conserve your org's resources.

If you create a flow that's triggered when a record is updated, we recommend first defining entry conditions. Then select the **Only when a record is updated to meet the condition requirements** option for When to Run the Flow for Updated Records.

Condition Requirements

All Conditions Are Met (AND) ▼

Field	Operator	Value
 Enrollment Status ×	Equals ▼	 Approved ×

5. Add Get Records to fetch related Student__c.

 **Get Records** ✕

9. Save as Enrollment Approved Action → Activate.

Activity 3: Auto-Assign Instructor Based on Course Category

Purpose:

Assign Instructor automatically based on Course category.

Rules:

Technical → Instructor A

Language → Instructor B

Non-Technical → Instructor C

Steps:

1. Prepare Instructor__c records with codes (e.g., INSTR_A, INSTR_B, INSTR_C).
2. Create Record-Triggered Flow on Enrollment__c (created/updated).
3. Add Get Records to fetch related Course__c.
4. Add Decision element on Course__r.Category__c:
5. Technical / Language / Non-Technical outcomes.
6. For each outcome:
7. Get Instructor record (A/B/C) based on code or name.
8. Update Records: set Instructor__c = Get_Instructor_X.Id.
9. Save as AutoAssign_Instructor → Activate.

10.

Activity 4: Auto-Create Task for Follow-Up

Purpose:

When Enrollment is “Requested”, create a follow-up task for Admin.

Steps:

1. Create Record-Triggered Flow on Enrollment__c.

2. Trigger: Record created or updated; condition Enrollment_Status__c = "Requested".

 Configure Start ×

* Object

Enrollment

Configure Trigger

Trigger the Flow When:

10. Save as Create_Followup_Task → Activate.

Milestone 11 – Reports:

Activity 1: Create “Students by Status” Report

1. Go to **Reports** → **New Report**.
2. Report Type: **Students**.
3. Group rows by **Status__c**.
4. Add columns as needed (Name, Email, Phone).
5. Save as **Students by Status**.

Activity 2: Create “Enrollments by Course” Report

1.New Report → Report Type: **Enrollments**.

2.Grouprows by **Course__r.Name**.

3.Show Record Count per course.

4.Save as **Enrollments by Course**

Activity 3: Create “Pending Enrollment Approvals” Report

1.New Report → **Enrollments** report type.

2.Filter: **Enrollment_Status__c = "Requested"**.

3.Add columns (Student, Course, Owner, Created Date).

4.Save as **Pending Enrollment Approvals**.

Report: Enrollments
Pending Enrollment Approvals

Total Records: 1

	Enrollment: Enrollment Name	Course	Student	Enrollment: Owner Name	Enrollment: Created Date
1	ENR-0003	UI UX	Test Student 1	Bharathi C	9/29/2026

Activity 4: Create “Revenue Report (Fees Paid)” Report

1. New Report - **Enrollments** report type.
2. Filter: **Fees_Paid__c = TRUE**.
3. Group by **Course__r.Name**.
4. Summarize **Course_Fee__c** or similar fee field.
5. Save as **Revenue Report – Fees Paid**.

a

Report: Enrollments
Revenue Report - Fees Paid

Total Records: 3 Total Fees Paid: 3

Course	Enrollment: Enrollment Name	Fees Paid
MBA Basics (1)	ENR-0002	1
Subtotal		1
Python (1)	ENR-0001	1
Subtotal		1
UI UX (1)	ENR-0003	1
Subtotal		1
Total (3)		3

Milestone 12 – Dashboards:

Activity 1: Create “Student Management Dashboard”

Steps:

1. Go to **Dashboards** → **New Dashboard**.
2. Name: **Student Management Dashboard**.

3. Select folder → **Create**.
4. Select the new Dashboard folder and Save.

Add components:

- **Donut Chart** → using **Students by Status** report.
- **Bar Chart** → using **Enrollments by Course** report.
- **Gauge** → using **Revenue Report – Fees Paid** (sum of revenue field).
- **Table** → using **Pending Enrollment Approvals** report.

4. Arrange components on canvas.

Click **Save** → **Done**.

Milestone 13 – Security Setup

Activity 1: Configure Profiles

):

1. Go to **Setup** → **Profiles** → **New** (or **Clone Profiles** Required:

- **Admin** – Full access.
- **Enrollment Officer** – Create/Update Enrollments.
- **Instructor** – Read-only access to assigned Enrollments.

2.Steps (example for Enrollment Officer fName:
Enrollment Officer.

3.In Object Settings:

- Enrollment__c: Read, Create, Edit.
- Student__c / Course__c: Read (and Edit if required).

4.Save.

Repeat similarly for Instructor profile with Read-Only on Enrollments

Activity 2: Create Permission Sets

- 1.Go to Setup → Permission Sets → New.
- 2.Create Custom Object Access (additional access to project objects if needed).
- 3.Create Dashboard Editor (Create/Customize Reports & Dashboards permissions).
- 4.Assign to relevant users.

Activity 3: Configure Sharing & OWD

Steps:

- 1.Go to Setup → Sharing Settings.
- 2.Set Organization-Wide Defaults:

- **Students (Student__c):** Public Read/Write.
- **Courses (Course__c):** Public Read/Write.
- **Enrollments (Enrollment__c):** Private.

3. Save.

For Instructor access to assigned Enrollments, optionally:

- Add a **User lookup** on Enrollment (Instructor User).
- Use a simple **Record-Triggered Flow** to set **OwnerId = Instructor User** so they can see only their own records.

7. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, screenshots were captured from the Salesforce user interface to verify the proper functioning of all implemented features of the Student Enrollment & Course Management System (SECMS). These include student, course, instructor, and enrollment record creation; validation rule checks for mandatory fields, eligibility, and enrollment constraints; verification of record type behavior for different course categories; flow execution for automated enrollment approvals and seat availability checks; and Apex trigger functionality to ensure automatic confirmation and record updates. Additionally, screenshots of generated reports and dashboards were documented to validate accurate data visualization, enrollment tracking, and performance monitoring. Submit the Screenshots while testing.

8. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized data
- Automated workflows
- Real-time reporting

Disadvantages

- Salesforce dependency
- Requires initial configuration effort

9. Conclusion:

The Salesforce Student Enrollment & Course Management System successfully streamlines the entire student academic lifecycle—from student registration and course creation to enrollment management, instructor assignment, approvals, revenue tracking, and reporting. By leveraging Salesforce’s automation tools such as validation rules, flows, approval processes, and dashboards, the system improves data accuracy, operational efficiency, and decision-making. This project demonstrates how Salesforce can transform manual academic processes into a scalable, reliable, and user-friendly digital solution.

10. FUTURE SCOPE

- Payment gateway integration
- Student self-service portal
- Analytics-driven insights
- Mobile access support

11. APPENDIX

- Source Code: Salesforce Configuration
- Dataset: Salesforce Objects
- GitHub / Demo: Salesforce Developer Org

Thank You
